

# CLT-371A Camera Link Translator

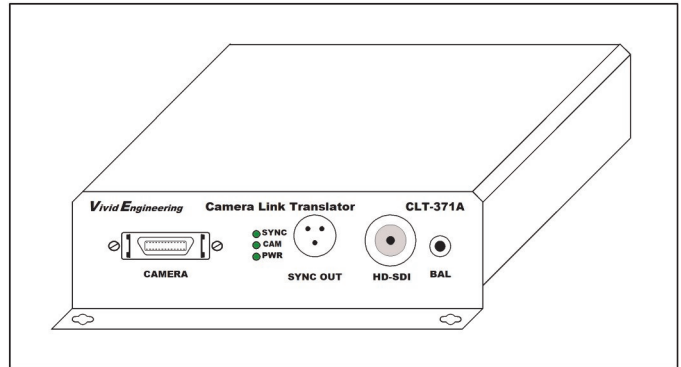

The CLT-371A Camera Link Translator converts Camera Link video to HD-SDI. Camera Link to HDMI & DVI are also supported with an inexpensive external adapter.

The CLT-371A works with most color and monochrome base-configuration Camera Link cameras. HD-SDI output is either 1920x1080 or 1280x720.

The CLT-371A requires no programming and enables the use of Camera Link cameras without frame grabber or computer.

Features include automatic frame rate adaptation, Bayer white balance correction, and a comm port for camera set-up and control.

The CLT-371A is available as a device housed in an aluminum enclosure, or as a module.

## Features

- **Converts Camera Link video to HD-SDI**  
- Or to HDMI & DVI-D with inexpensive external adapter
- **Works with most Camera Link color and monochrome base-configuration cameras**
- **HD-SDI output: 1920x1080 @ 29.97/30p or 1280x720 @ 59.94/60p**
- **Enables use of Camera Link cameras without frame grabber or computer**
- **Automatic frame rate adaptation; no camera synchronization required**
- **Crop and center for images larger/smaller than 1920x1080 or 1280x720**
- **Bayer white balance correction capability**
- **RS-232 port for camera set-up and control**  
- Or USB with adapter
- **Configured via rear-panel switches, no special software or programming required**
- **Camera/system synchronization support**
- **Device version includes multi-nation power supply**
- **Device version housed in aluminum enclosure w/ mounting flange**
- **Module version measures 120mm x 120mm**
- **3-year warrantee**
